

DT Engineering and Rockwell Automation Solidify OEM Partner Agreement

DT Engineering and Rockwell Automation join forces to improve industrial automation offerings

Lebanon, Missouri: December 8, 2017 – DT Engineering has joined forces with Rockwell Automation Inc. as an approved OEM Partner for North America in the Rockwell Automation PartnerNetwork program. Rockwell Automation OEM Partners are machine and equipment builders that help provide flexible and efficient equipment leveraging Rockwell Automation solutions.

“Initiating this OEM Partner agreement, with the world’s largest industrial automation company, will differentiate DT Engineering automation solutions through leading edge technology offerings and a broader service network to leverage improved customer support,” stated Jim Sheldon, CEO and Owner of DT Engineering.

Beginning late in 2016, when Sheldon acquired DT Engineering, the company has executed on a purposed shift, “up and to the right”, essentially repositioning the company of 84 years toward top-tier, industrial automation solutions required in today’s Industry 4.0 environment.

“There was no way to make this purposed shift without the partnership, products, solutions, and depth of knowledge found in Rockwell Automation,” Sheldon said.

“Through the OEM Partner Agreement, DT Engineering will collaborate with the Rockwell Automation technology teams, continuing development efforts with the iTRAK and MagneMotion technologies and offerings to better serve our collective customer base and the future of automation in this Industry 4.0 environment,” states Marco Wishart, vice president and general manager, motion control business, Rockwell Automation.
